DETAILED ACTION

Response to Amendment

1. Applicants' amendment and remarks, filed July 20, 2005, has been made of record and entered. Claims 1-69, 71-74, & 76-78 have been amended. Claims 70 & 75 have been canceled.

Claims 1-69, 71-74, & 76-78 are currently pending and under consideration.

Claim Objections

2. Claims 9-45, 53-67, & 71-72 are objected to because of the following informalities:

A. In claims 9, 12, 15, 18, 21-45, & 53-67, line 2, "wherein" and "are selected" are suggested deleted and replaced thereof with –comprises--.

B. In claims 10-11, 13-14, 16-17, 19-20, & 71-72, "level" is suggested changed to –amount--.

Appropriate correction is required.

Double Patenting

3. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

4. Claims 1-69, 71-74, & 76-78 are provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-45 of **copending Application No. 10/303,977** (hereinafter copending '977). Although the conflicting claims are not identical, they are not patentably distinct from each other because of the following reasons.

There is no patentable distinction seen between the claimed catalyst structure and that disclosed by the copending '977. It is considered the limitation on "for the polycondensation of a polyester monomer" in the preamble of the instant claims are intended use limitation, and that the difference in the intended use in the instant claims and the claims of the copending '977 has no bearing on the patentability of the claimed catalyst structure. See MPEP section 2111.02 and 2114. See also *In re Pearson* and *In re Thrau*.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

Response to Applicants' Arguments

5. Applicants' amendment and response filed on July 20, 2005 has been fully reconsidered, but not deemed persuasive in view of the new ground of rejection above.

Art Unit: 1754

6. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
